Swift 2.0

# PROTOCOL EXTENSIONS

# We have protocols

```
protocol MyProtocol {  
    func noop() {}  
}
```

```
@protocol MYProtocol  
    -(void) noop;  
@end
```

# We have extensions

```
extension MyClass {  
  func rock() -> String {  
    return "🎵🎵🎵🎵🎵"  
  }  
}
```

```
@interface MYClass : ()  
  -(NSString *) rock {  
    return @"rock"  
  }  
@end
```

P<sub>rotocol</sub> O<sub>riented</sub> P<sub>rogramming</sub>

# Now that POP's

A coder's dreaming example

# P<sub>rotocol</sub> O<sub>riented</sub> P<sub>rogramming</sub>

- defines interfaces
- provides default / common behaviour
- enables Retroactive Modeling

Swift 2.0

**OPEN SOURCE**

# Servable

- inspired express.js
- lightweight
- flexible
- fueled by protocols
